

Meet The All New Beta SE

Enhanced Core Durability

Betta SE is more durable and reliable by incorporating new technology and materials into its core components design.

Re-engineered Twin SCT Motors

The improved chip-controlled twin Salt Chlorine Tolerant SCT Motors are extremely efficient and reliable providing continually trouble-free cleaning of pool surface.

Solar Powered

Runs completely on solar power. The high capacity built-in lithium battery gets charged by the strong and highly efficient solar panel with durable corrosion resistant surface.

Smart Auto Clean

Automatically cleans various floating debris on the water's surface; such as leaves, dust, pollen, dead insects, etc.

Large Easy-Clean Debris Basket

With a handle and fine mesh filter, there is no need to remove Beta from the water. Simply dock it, open the cover and empty the basket.

Freshwater and Saltwater

Betta reliably delivers excellent cleaning performance in both freshwater and saltwater pools.

Ultrasonic Radar Sensors

Ultrasonic radar senses obstacles and automatically reroutes itself to clean the entire pool.

UV Resistant Body

The special UV resistant coating and material prevent damages caused by ultraviolet radiation emitted by the sun.

Cordless with Remote Control

Wave goodbye to long cables that get in the way. Wireless remote control function is convenient for you to easily switch between automatic and remote control use.
